# Shadows

Add or remove shadows to elements with box-shadow utilities.

Add video calling functionality to your website or app with Whereby's powerful SDK.

[Examples](#)[Sass](#)[Variables](#)[Utilities API](#)

## Examples

While shadows on components are disabled by default in Bootstrap and can be enabled via `$enable-shadows`, you can also quickly add or remove a shadow with our `box-shadow` utility classes. Includes support for `.shadow-none` and three default sizes (which have associated variables to match).

No shadow

Small shadow

Regular shadow

Larger shadow

```
<div class="shadow-none p-3 mb-5 bg-light rounded">No shadow</div>  
<div class="shadow-sm p-3 mb-5 bg-body rounded">Small shadow</div>  
<div class="shadow p-3 mb-5 bg-body rounded">Regular shadow</div>  
<div class="shadow-lg p-3 mb-5 bg-body rounded">Larger shadow</div>
```

## Sass

### Variables

```
$box-shadow: 0 .5rem 1rem rgba($black, .15);  
$box-shadow-sm: 0 .125rem .25rem rgba($black, .075);  
$box-shadow-lg: 0 1rem 3rem rgba($black, .175);  
$box-shadow-inset: inset 0 1px 2px rgba($black, .075);
```

## Utilities API

Shadow utilities are declared in our utilities API in `scss/_utilities.scss`. [Learn how to use the utilities API.](#)

```
"shadow": (  
  property: box-shadow,  
  class: shadow,  
  values: (  
    null: $box-shadow,  
    sm: $box-shadow-sm,  
    lg: $box-shadow-lg,  
    none: none,  
  )  
)
```

),

Designed and built with all the love in the world by the Bootstrap team with the help of our contributors.
