# Sizing

Easily make an element as wide or as tall with our width and height utilities.

I've spent 2 years learning DNS while building NSLookup.io. Now, I'm teaching everything I know.

Sass

Utilities API

## Relative to the parent

Width and height utilities are generated from the utility API in `_utilities.scss`. Includes support for **25%**, **50%**, **75%**, **100%**, and **auto** by default. Modify those values as you need to generate different utilities here.

Width 25%

Width 50%

Width 75%

Width 100%

Width auto

```
<div class="w-25 p-3" style="background-color: #eee;">Width 25%</div>
<div class="w-50 p-3" style="background-color: #eee;">Width 50%</div>
<div class="w-75 p-3" style="background-color: #eee;">Width 75%</div>
<div class="w-100 p-3" style="background-color: #eee;">Width 100%</div>
<div class="w-auto p-3" style="background-color: #eee;">Width auto</div>
```

Height 25%

Height 50%

Height 75%

Height 100%

Height auto

```
<div style="height: 100px; background-color: rgba(255,0,0,0.1);">
  <div class="h-25 d-inline-block" style="width: 120px; background-color: rgba(0,0,2
  <div class="h-50 d-inline-block" style="width: 120px; background-color: rgba(0,0,2
  <div class="h-75 d-inline-block" style="width: 120px; background-color: rgba(0,0,2
  <div class="h-100 d-inline-block" style="width: 120px; background-color: rgba(0,0,
  <div class="h-auto d-inline-block" style="width: 120px; background-color: rgba(0,0
</div>
```

You can also use `max-width: 100%;` and `max-height: 100%;` utilities as needed.

Max-width 100%

```

```

Max-height  
100%

```
<div style="height: 100px; background-color: rgba(255,0,0,.1);">  
  <div class="mh-100" style="width: 100px; height: 200px; background-color: rgba(0,0,0,.1);">  
</div>
```

## Relative to the viewport

You can also use utilities to set the width and height relative to the viewport.

```
<div class="min-vw-100">Min-width 100vw</div>  
<div class="min-vh-100">Min-height 100vh</div>  
<div class="vw-100">Width 100vw</div>  
<div class="vh-100">Height 100vh</div>
```

## Sass

### Utilities API

Sizing utilities are declared in our utilities API in `scss/_utilities.scss`. [Learn how to use the utilities API.](#)

```
"width": (  
  property: width,  
  class: w,  
  values: (  
    25: 25%,  
    50: 50%,  
    75: 75%,  
    100: 100%,  
    auto: auto  
  )  
)  
,  
"max-width": (  
  property: max-width,  
  class: mw,  
  values: (  
    25: 25%,  
    50: 50%,  
    75: 75%,  
    100: 100%,  
    auto: auto  
  )  
)
```

```
    property: max-width,
    class: mw,
    values: (100: 100%)
  ),
  "viewport-width": (
    property: width,
    class: vw,
    values: (100: 100vw)
  ),
  "min-viewport-width": (
    property: min-width,
    class: min-vw,
    values: (100: 100vw)
  ),
  "height": (
    property: height,
    class: h,
    values: (
      25: 25%,
      50: 50%,
      75: 75%,
      100: 100%,
      auto: auto
    )
  ),
  "max-height": (
    property: max-height,
    class: mh,
    values: (100: 100%)
  ),
  "viewport-height": (
    property: height,
    class: vh,
    values: (100: 100vh)
  ),
  "min-viewport-height": (
    property: min-height,
    class: min-vh,
    values: (100: 100vh)
  ),
  ),
```
