

Form controls

Give textual form controls like **<input>**s and **<textarea>**s an upgrade with custom styles, sizing, focus states, and more.

I've spent 2 years learning DNS while building NSLookup.io. Now, I'm teaching everything I know.

Datalists

Sass

Variables

Example

Email address

name@example.com

```
Example textarea
```

Sizing

Set heights using classes like .form-control-lg and .form-control-sm.

```
.form-control-lg

Default input
.form-control-sm
```

```
<input class="form-control form-control-lg" type="text" placeholder=".form-control-l
<input class="form-control" type="text" placeholder="Default input" aria-label="defa
<input class="form-control form-control-sm" type="text" placeholder=".form-control-s</pre>
```

Disabled

Add the disabled boolean attribute on an input to give it a grayed out appearance and remove pointer events.

```
Disabled input

Disabled readonly input
```

```
<input class="form-control" type="text" placeholder="Disabled input" aria-label="Dis
<input class="form-control" type="text" value="Disabled readonly input" aria-label="
</pre>
```

Readonly

Add the readonly boolean attribute on an input to prevent modification of the input's value.

Readonly input here...

```
<input class="form-control" type="text" value="Readonly input here..." aria-label="r</pre>
```

Readonly plain text

If you want to have <input readonly> elements in your form styled as plain text, use the .form-control-plaintext class to remove the default form field styling and preserve the correct margin and padding.

```
Email email@example.com

Password
```

```
<div class="mb-3 row">
  <label for="inputPassword" class="col-sm-2 col-form-label">Password</label>
  <div class="col-sm-10">
        <input type="password" class="form-control" id="inputPassword">
        </div>
```

```
email@example.com
Password
Confirm identity
```

File input

Default file input example		
Choisir un fichier	Aucun fichier n'a été sélectionné	
Multiple files input example		
Choisir des fichiers	Aucun fichier n'a été sélectionné	
Disabled file input example		
Choisir un fichier	Aucun fichier n'a été sélectionné	
Small file input example		

Choisir un fichier | Aucun fichier n'a été sélectionné

Large file input example

Choisir un fichier

Aucun fichier n'a été sélectionné

```
<div class="mb-3">
  <label for="formFile" class="form-label">Default file input example</label>
  <input class="form-control" type="file" id="formFile">
</div>
<div class="mb-3">
  <label for="formFileMultiple" class="form-label">Multiple files input example</lab</pre>
  <input class="form-control" type="file" id="formFileMultiple" multiple>
</div>
<div class="mb-3">
  <label for="formFileDisabled" class="form-label">Disabled file input example</labe</pre>
 <input class="form-control" type="file" id="formFileDisabled" disabled>
</div>
<div class="mb-3">
  <label for="formFileSm" class="form-label">Small file input example</label>
  <input class="form-control form-control-sm" id="formFileSm" type="file">
</div>
<div>
  <label for="formFileLg" class="form-label">Large file input example</label>
 <input class="form-control form-control-lg" id="formFileLg" type="file">
</div>
```

Color

Color picker

```
<label for="exampleColorInput" class="form-label">Color picker</label>
<input type="color" class="form-control form-control-color" id="exampleColorInput" v</pre>
```

Datalists

Datalists allow you to create a group of <option>s that can be accessed (and autocompleted) from within an <input>. These are similar to <select> elements, but come with more menu styling limitations and differences. While most browsers and operating systems include some support for <datalist> elements, their styling is inconsistent at best.

Learn more about support for datalist elements.

```

Type to search...
```

Sass

Variables

\$input-* are shared across most of our form controls (and not buttons).

```
$input-padding-y:
                                         $input-btn-padding-y;
$input-padding-x:
                                         $input-btn-padding-x;
$input-font-family:
                                         $input-btn-font-family;
$input-font-size:
                                         $input-btn-font-size;
$input-font-weight:
                                         $font-weight-base;
$input-line-height:
                                         $input-btn-line-height;
$input-padding-y-sm:
                                         $input-btn-padding-y-sm;
                                         $input-btn-padding-x-sm;
$input-padding-x-sm:
$input-font-size-sm:
                                         $input-btn-font-size-sm;
$input-padding-y-lg:
                                         $input-btn-padding-y-lg;
```

```
$input-btn-padding-x-lg;
$input-padding-x-lg:
$input-font-size-lg:
                                         $input-btn-font-size-lg;
$input-bg:
                                         $white;
$input-disabled-bg:
                                         $gray-200;
$input-disabled-border-color:
                                         null;
$input-color:
                                         $body-color;
$input-border-color:
                                         $gray-400;
$input-border-width:
                                         $input-btn-border-width;

                                         $box-shadow-inset;
                                         $border-radius;
$input-border-radius:
$input-border-radius-sm:
                                         $border-radius-sm;
$input-border-radius-lg:
                                         $border-radius-lg;
$input-focus-bg:
                                         $input-bg;
$input-focus-border-color:
                                         tint-color($component-active-bg, 50%);
$input-focus-color:
                                         $input-color;
$input-focus-width:
                                         $input-btn-focus-width;
$input-focus-box-shadow:
                                         $input-btn-focus-box-shadow;
$input-placeholder-color:
                                         $gray-600;
$input-plaintext-color:
                                         $body-color;
$input-height-border:
                                         $input-border-width * 2;
$input-height-inner:
                                         add($input-line-height * 1em, $input-padding
$input-height-inner-half:
                                         add($input-line-height * .5em, $input-paddin
$input-height-inner-quarter:
                                         add($input-line-height * .25em, $input-paddi
$input-height:
                                         add($input-line-height * 1em, add($input-pad
$input-height-sm:
                                         add($input-line-height * 1em, add($input-pad
$input-height-lg:
                                         add($input-line-height * 1em, add($input-pad
```

\$form-label-* and \$form-text-* are for our <label>s and .form-text component.

```
$form-label-margin-bottom:
$form-label-font-size:
$form-label-font-style:
$form-label-font-weight:
$form-label-color:

null;
```

\$form-text-margin-top:
\$form-text-font-size:
\$form-text-font-style:
\$null;

\$form-text-font-weight: null;

\$form-text-color: \$text-muted;

\$form-file-* are for file input.

\$form-file-button-color: \$input-color;

\$form-file-button-bg: \$input-group-addon-bg;

\$form-file-button-hover-bg: shade-color(\$form-file-button-bg, 5%);
